

What I claim is:

1. A non-toxic disinfectant composition for topical application to the skin comprising a composition of isopropyl alcohol of at least 24.0% to about 27.0% by weight; sesame oil of at least 53.0% by weight, lemon oil ranging between 1.0% to 2.0% in weight and menthol ranging from about 0.1% to about 1.0% in weight, mixed homogeneously, said sesame oil supplementing and neutralizing the dehydrating effect of the alcohol.
2. A non-toxic disinfectant composition according to Claim 1, wherein said sesame oil is about 63.0% to about 67.0% by weight.
3. A non-toxic disinfectant composition according to Claim 1, wherein said menthol is present from about 0.3 to about 0.5 grams per each 10 ml mixture of the isopropyl alcohol and sesame oil.
4. A non-toxic disinfectant composition according to Claim 1, wherein said composition has an effective treatment life of at least eight hours and is stable for at least six months.
5. A non-toxic disinfectant composition according to Claim 1, wherein said composition decreases bacterial growth to at least a $6.0 \log_{10}$ reduction when compared to normal bacterial growth.
6. A non-toxic disinfectant composition according to Claim 1, wherein said composition decreases viral growth to at least a $2.7 \log_{10}$ reduction when compared to normal viruses growth.
7. A disinfectant composition for topical application to a human comprising a composition of isopropyl alcohol of at least 24.0% by weight; sesame oil ranging from about 63.0% to about 67.0% by weight, lemon oil not exceeding 3.0% by weight and menthol not exceeding 1.0% by weight, mixed homogeneously, said sesame oil supplementing and neutralizing the dehydrating effect of the alcohol and said menthol increasing shelf stability.

8. A disinfectant composition according to Claim 7, wherein said composition has an effective treatment life of at least eight hours.

9. A disinfectant composition according to Claim 7 wherein said isopropyl alcohol is anhydrous USP which is not less than 99.0% USP.

10. A disinfectant composition according to claim 7 wherein said sesame oil is 100% pure expeller pressed.

11. A disinfectant composition according to claim 7 wherein said lemon oil is 100% pure USP Grade composition.

12. A disinfectant composition according to claim 7 wherein said composition has a shelf life over 3 months.

13. A disinfectant composition according to claim 7 wherein said composition is a solution which is clear.

14. A non-toxic disinfectant composition according to Claim 7, wherein said composition decreases bacterial growth to at least a $6.0 \log_{10}$ reduction when compared to normal bacterial growth.

15. A non-toxic disinfectant composition according to Claim 7, wherein said composition decreases viral growth to at least a $2.7 \log_{10}$ reduction when compared to normal viruses growth.

16. A disinfectant composition for objects comprising a composition of a solution isopropyl alcohol of about 24.0% to about 27.0% by weight; sesame oil ranging from about 63.0% to about 73.0% by weight, lemon oil ranging between about 1.0% to about 3.0% in weight and menthol ranging from about 0.5% to 1.0% in weight, mixed homogeneously, said sesame oil supplementing and neutralizing the dehydrating effect of the alcohol and said menthol eliminating the layering of the

alcohol and oils.

17. A disinfectant composition according to Claim 16 wherein said isopropyl alcohol is anhydrous USP which is not less than 99.0% USP.

18. A disinfectant composition according to claim 16 wherein said sesame oil is 100% pure expeller pressed.

19. A disinfectant composition according to claim 16 wherein said lemon oil is 100% pure USP Grade composition.

20. A disinfectant composition according to claim 16 wherein said composition has a shelf life over 6 months.

21. A disinfectant composition according to claim 16 wherein said composition is a solution which is clear.

22. A composition of claim 16 applied to dental floss.

23. A composition of claim 16 applied to a toothbrush.
